

LAMICOLOR®

LAMINATI PLASTICI DECORATIVI ALTA PRESSIONE

Messrs
LAMINATE INNOVATIONS

Wednesday, 15th June 2011

STATEMENT

Our High pressure decorative laminates LAMCO^{HPL} are manufactured using phenol-formaldehyde resins and melamine-formaldehyde resins.

Decorative laminates LAMCO^{HPL} have been tested using the procedure issued by *Greenguard Environmental Institute* and the results are that LAMCO^{HPL} have a very low level of formaldehyde emission, that is:

HCOH emission ≤ 10 ppb (part per billion)
